DisneyNature Earth Premier

Wyland will unveil a monumental original work of art inspired by DisneyNature's first feature film, Earth, at the premier in Hollywood on April 18. This 4,000-square-foot painting will be on display at the El Capitan Theater throughout the month of May. The first film in the DisneyNature series, Earth, narrated by James Earl Jones, tells the remarkable story of three animal families and their amazing journey across the planet we call home. Earth combines rare action, unimaginable scale and impossible locations by capturing the most intimate moments of our planet's wildest and most elusive creatures. This epic adventure begins nationwide on Earth Day, April 22, 2009. **Buy a ticket for opening week and Disney will plant a tree in your honor.** For more information about this stunning movie, visit <http://disney.go.com/disneynature/earth/>.
