First Annual Wyland Galleries Virtual Show

July 11

Wyland Galleries is doing its part to reduce its carbon footprint with the first-ever Wyland Virtual Gallery Show. Thanks to web-casting technology, Wyland will host the virtual show live from Key West connecting directly with guests at each Wyland Galleries location. "A traditional 15-city author or artist tour can generate up to three tons of CO₂ in travel alone," Wyland says. "This type of event allows artists to interact in a visual, one-on-one way with guests - and reduce our impact on the planet."

Show highlights include:

- Show specials and new releases for 2009, including sculptures, giclees, and Wyland's new eco-friendly paintings for the Vancouver Olympic Games.
- Q&A with Wyland about his latest efforts to inspire people.
- Plus! Never before seen film footage from one of the most exciting years in Wyland history, from the artist's mega-size mural project for the Beijing Olympic Games, his 2+acre sized mural of planet earth, and his work on the new DisneyNature film, "EARTH."

Visit www.wyland.com for more details.

Mediterranean Princess Cruise

August 8

Join Wyland aboard Princess Cruise's Ruby Princess for a 12-day Greek Islands and Mediterranean cruise. Travel from Rome to Venice through the stunning Mediterranean Sea. Visit www.princess.com for more information or to book this fabulous getaway.

Wyland to Open Two Restaurants in Hawaii

A start-up venture affiliated with Wyland plans to open two seafood restaurants on O'ahu early next year — the first in Waikiki in January followed by a second in April at the West O'ahu visitor destination Ko Olina Resort & Marina. The restaurants, called Wyland Grille, will be led by restaurateur Dave Hanley of Lahaina, Maui, and will support the vision of the nonprofit Wyland Foundation committed to eco-friendly practices tied to the ocean and farming.

Wyland.com gets a facelift!

Be sure to check out the launch of the new www.wyland.com on July 15. More changes to follow soon to wylandgalleries.com, wylandstudiostore.com, and wylandfoundation.org. Stay tuned!

Happy Birthday, Wyland!

Wyland Invites You To Laguna Beach Raffle

Wyland is supporting the efforts of a new partnership between the Wyland Foundation and the Ocean Institute as a sponsor of the Ocean Institute 5th Annual Home Raffle. Funds from the raffle support children's education programs at the Ocean Institute and the Wyland Foundation, who will be working together in fall to bring the Wyland Clean Water Mobile Learning Center to students throughout Orange County and San Diego. Purchasing a raffle ticket helps keep the truck on the road as it travels to dozens of schools.

Visit <http://www.ocean-institute.org/raffle/wyland.html> for your chance to win a Laguna Beach home or \$1 million in cash and hundreds of other prizes - all the while supporting children, the ocean and the environment.

FOCUS (Forests, Ocean, Climate and Us) New Wyland Foundation Partnership with US Forest Service and NOAA

In partnership with the United States Forest Service (USFS) and NOAA's Office of National Marine Sanctuaries, marine life artist Wyland and the Wyland Foundation joined kids from the Washington, DC area to celebrate National Get Outdoors Day and World Ocean Day, as well as the launch of an exciting new environmental art and education campaign. Young artists painted a series of ten canvas murals representing watersheds, from the forest to the sea, and issues of climate change. Wyland painted a separate canvas mural featuring Smokey the Bear - ready for the beach in his swim trunks and carrying his mask and snorkel.

FOCUS (Forests, Ocean, Climate - and US) is a nationwide campaign in partnership with the U.S. Forest Service, NOAA, and the Wyland Foundation that uses art and science to teach young people about our forests and ocean — and how these two irreplaceable resources hold the key to the future of our water supplies, climate and global health. Never before have these organizations worked together in such a way for such an important cause. Our goal is to engage all students across the country, bringing together art and science activities and traveling exhibitions, to fundamentally change the way we see, understand, and care for our environment.

In 2009-2010, the FOCUS program will emphasize mural painting events at communities across the nation. The program will include a web portal with research materials from the U.S. Forest Service, Wyland Foundation, and NOAA, downloadable photos, art instruction videos, carbon calculators, and recommendations for people everywhere to discover U.S. forest lands, coasts, and marine sanctuaries and share their knowledge and inspiration locally through community mural painting projects. In spring, the program will take the science behind "Forests, ocean, climate change - and us" on the road with a 1,000 square foot biodiesel powered mobile learning center, featuring an on-board theater, video microscopes, water management exhibits, a google earth kiosk and more.
